

# KPAC

## **Keystone Parent Advisory Council**

KPAC was formed last year to serve as an advisory council and support system for parents who have students enrolled in a school district served by Keystone.

Last year, this council accomplished several tasks such as: keeping informed of legislative issues that would have an impact on the education of their children, making parents aware of what is important in an IEP and providing support to each other.

Some of the goals this year is to advise special education administrators, school district administrators, school board members, legislative bodies, and others involved in the needs of students with special needs, keep abreast of current legislative issues, and assist parents in special education issues.
